With your generosity you help children who are "slightly different" -

Thank you on behalf of Daniel for allowing him to benefit from a special therapy for autistic children!

Dear Mr. Schick,

the four year old Vienna resident shows disharmonious development, including a distinct deficit in his language. He was diagnosed with infantile autism, with focus on problems in perception and integration. People suffering from autism have basic difficulties in their social interaction and communication, irrespective of their competences. During the therapy goals for promoting the client are set and a promotion plan is worked out. The goal is maximum autonomy and quality of life.

Thank you

Daniel at his special therapy.

Thanks to your support we can promote little Daniel in a very special way: A specific therapy for autistic children will support his personal development and skills.

Dear Mr. Schick,
we wish you and your business partners a Merry Christmas and a Happy New Year!
