Vienna, November 16<sup>th</sup> 2009

Dear Dr. Schick,

**On behalf of Andreas, his parents and the team of Stiftung Kindertraum, we would like to thank you very much for your kind support.**

Andreas is 11 years old and lives in Vienna. **He profits from a special therapy called Equotherapy.** This specific therapy with horses will guide him how to treat animals with respect and he will promote playfully his own emotional and social intelligence. In general, animals challenge humans to establish a relationship – whereby they open new sources for future developments.

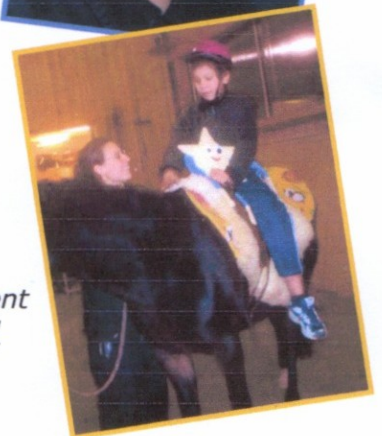

*Andreas shows disharmonious development in his motor and linguistic skills. Furthermore his parents noticed some stereotypical behaviour patterns while eating and playing. With the support of an autism-oriented therapy Andreas has already made great progress regarding his social and cognitive skills, nevertheless he still needs some help with all major everyday activities. That requires a lot of time and educational management in comparison to other children. Andreas feels strongly attracted to horses and is happily looking forward to a year-long therapy with his beloved animals.*

Dear Mr. Schick,  
we would like to wish you and your business partners  
a Merry Christmas and a Happy New Year!

Kind regards

*Britta Wittmann*
