Dear Dr. Schick,

Soon it will be Christmas

And again your donation will make a wish come true!

Adrian, your „wish kid“, likes to say

THANK YOU!

The 10-year old boy, who is living in Vienna, is suffering from semiplegia since the operation of a brain tumor. As 30 % of the tumor could not be removed, he has to undergo frequent controls. Adrian depended on a wheelchair, however he slowly learned to walk again.

Adrian is glad about his computer, printer and the steering wheel for the games!

Adrian takes a great interest in technical equipment and longed for a fast computer with printer for school and spare time. Concerning with the new equipment will also help him increasing his attentiveness and power of concentration. The boy was especially happy about the steering wheel, which will enable him to play his favourite race games!

Thank you for your trust and your longtime support!

Yours sincerely
