Vienna, October 24th 2006

We give shape to children's dreams and help build their confidence.

Dear Dr. Schick,

Sascha, his mother and the whole team of Stiftung Kindertraum would like to thank you for your trust and your longtime support!

Thanks to your support Sascha can benefit from a music therapy.

The 12-year old Sascha was diagnosed with atypical autism accompanied by a drastic mental retardation. At the age of 5 ½ years Sascha learned to speak his first words - before that, however, he was able to hum melodies which he had heard only once or twice - beautifully and without errors. Nowadays the boy is able to sing the whole musical „Elisabeth“. As he is all passionate about music, **the music therapy will undoubtedly help him to improve his ability to speak.**

Music has proven to be an advantageous therapy for encouragement of special needs such as, for instance, difficulties with speaking. Music, as well, supports creating a familiar and safe atmosphere and building up social contacts. For children like Sascha, who experience the world around themselves as chaotic and even terrifying, music represents an invaluable tool for further development.

Dear Dr. Schick,
we wish you and your business partners
a Merry Christmas and a Happy New Year!

Yours sincerely

Britta Wittmann
