

**With your donation you support the lasting improvement of the quality of life for children with disabilities or serious illnesses.**

Dear Dr. Schick,

we would like to thank you also this year for your effective support!

**We are happy to share Celina's joy with you and together say a heartfelt thank you!**

**Horses demand and promote – a huge gift for Celina!** The thirteen year old girl is very happy whenever she can care for her pony or take it for a ride. Interacting with her favourite animals in the heart of nature constitutes a welcome diversion for Celina. Besides reducing anxieties and promoting motivation and the positive sense of achievement it not least brings joy back into her life. Animals make dealing with communication and relationships easier, they demand focus and perseverance, they increase knowledge and competence – and simply heighten the children's spirits.

We wish you a Merry Christmas, happiness, health, success as well as lots of good-mood moments in the new year!
