

THANK YOU ON JAMIE'S BEHALF FROM KINDERTRAUM!

Dear Dr. Schick,

We look back on a time in which, despite all the challenges, we are able to enjoy small and large successes together.

Thank you very much for your trust and your valuable support for Jamie's greatest wish!

We wish you and your business partners a merry Christmas, relaxing holidays and a year filled with joy.

The Team of Stiftung Kindertraum

Jamie has responded well to neurofeedback training: His ability to concentrate and his overall mood have improved tremendously, which is why proceeding with training represents the optimal support option for him. Computerized brainwave training improves the functionality of the brain. Specific parameters of brain activity are measured by EEG and visualized by auditory and visual feedback. Through this feedback, the brain independently learns to better regulate itself and increase its own functionality.

Jamie, who lives in Vienna, copes with massive developmental difficulties. The 11-year-old needs a lot of guidance in everyday life and even minimal changes represent substantial challenges for him. He attends a high school as an integration student.

Vienna, November 2021
